Increased Fuel Economy
AMSOIL synthetic engine and drivetrain lubricants reduce friction, resulting not only in increased performance and protection, but increased fuel efficiency as well. With less resistance to internal moving parts, engines and equipment are able to operate at peak efficiency and deliver maximum mpg. Industry testing proves AMSOIL Signature Series Synthetic Motor Oil resists thermal and chemical breakdown better than conventional oils, providing premium protection for up to 25,000 miles, 700 hours of operation or one year, whichever comes first, in personal vehicles not operating under severe service and up to 15,000 miles, 700 hours of operation or one year, whichever comes first, in severe service. It reduces maintenance costs and allows vehicles to stay on the road longer, increasing profits.

Using AMSOIL Ea® Oil Filters in place of conventional filters provides even greater savings. Ea filters rank among the most efficient filters on the market and offer service intervals of either 25,000 miles/12 months or 15,000 miles/12 months, depending on application and severity of service.

Extended Drain Intervals
AMSOIL Eagle® Extended SAE 5W-40 Synthetic Diesel Oil resists thermal and chemical breakdown better than conventional oils, providing premium protection for up to 15,000 miles, 700 hours of operation or one year, whichever comes first, in personal vehicles not operating under severe service and up to 10,000 miles, 150 hours of operation or one year, whichever comes first, in severe service. It reduces maintenance costs and allows vehicles to stay on the road longer, increasing profits.

MyAMSOILGarage™
MyAMSOILGarage is a free online vehicle maintenance program that allows businesses to organize maintenance records for an unlimited number of vehicles and equipment. Schedule email reminders for future services and track any service performed, whether using AMSOIL products or not. MyAMSOILGarage is easy to use, yet features the capability to manage an entire fleet.

- Free and easy to use
- Organizes maintenance records for an unlimited number of vehicles, making it perfect for commercial use
- Accommodates all vehicles and equipment, from tractor-trailers to chainsaws
- Tracks any maintenance service performed
- Provides email service reminders
- Replaces expensive software programs

number of oil changes performed, which reduces the amount of waste oil generated. Deposits, sticky piston rings and oil blow-by, all of which cause reduced engine life, reduced fuel efficiency and more emissions pollution. The thicker oil left behind after volatilization contributes to damaging engines. Petroleum oils volatilize (burn off) more readily than AMSOIL synthetic oils and create a designed purpose, such as sulfur, nitrogen, oxygen and metal components. They are made to thin and flow when exposed to high temperatures and are made up of molecules that are easy to form and decompose. AMSOIL’s unique blend of high-temperature performance-conventional lubricants just don’t exist.

Why AMSOIL?

• World’s first true synthetic motor oil
• Leader in synthetic lubricant technology
• The only 20W-50 synthetic

The introduction of the world’s first synthetic motor oil to meet American Petroleum Institute service requirements in 1972 set all-new standards for motor oil quality. AMSOIL synthetic motor oil outperformed conventional petroleum motor oils on all tests. It was clear from the start that this innovative product would play a major role in engine performance and engine life.

AMSOIL has remained the leader in its commitment to quality and precision lubricant engineering, leading the charge over the past four decades with many industry firsts. This quality-first commitment has driven the introduction of numerous synthetic lubricants, premium filter-hone technologies and fuel additives that provide tangible, real-world value.

Today, virtually every engine component has been designed for the superior properties of AMSOIL synthetic lubricants and followed the AMSOIL lead with introductions of synthetic motor oils of their own.

Why Now?

• Automobiles are moving up to synthetics
• Helps vehicle reach longer
• Saves time & money

Modern engine technology is placing more burden on motor oils. Vehicle manufacturers are under tremendous pressure to provide fuel-efficient vehicles that produce fewer emissions than their predecessors. They employ a variety of techniques to improve efficiency and reduce emissions, and nearly all of them negatively impact motor oil. Engines are smaller, yet produce more powerful outputs. Oils are engineered to provide maximum performance even in these conditions. Enormous quantities of heavy streams of gasoline that reduce performance, while intake valve deposits also decrease efficiency. AMSOIL’s unique blend of high-temperature performance-conventional lubricants just don’t exist.

Why AMSOIL Synthetic Motor Oils Stand Up?

Why Establish an AMSOIL Commercial Account?

Save Approximately 25 Percent

AMSOIL commercial accounts purchase AMSOIL products at wholesale pricing, which is approximately 25 percent less than suggested retail. Large-volume orders are available for additional product and freight discounts.

Recieved Customized Service

Each commercial account is established and serviced by an independent AMSOIL Dealer who has been trained and is knowledgeable about AMSOIL products and services.

Knowledgeable Technical Support

In addition to Dealer support, AMSOIL INC. corporate personnel is available to offer further technical and administrative support recommendations, using and technical services.

AMSOIL Technical Services Department monitors the latest industry developments to analyze equipment needs, identify technical issues and provide accurate product recommendations for virtually any application. AMSOIL communicates important information regarding product and performance and more to the Commercial Account Zone available at amsoil.com.

Full Line of Quality Products

AMSOIL is the first producer of synthetic lubricant technology, manufacturing premium synthetic motor oils, hydraulic fluids, compressor oils and more. AMSOIL advanced filtration systems and quality fuel additives make up a complete product line that satisfies the demands of nearly any commercial business. AMSOIL products are engineered to maximum performance and efficiency for their intended applications. Equipment running at peak efficiency lasts longer and reduces downtime.
